

MSDS Report

According to UN GHS (the 7th revised edition)

Issue date: Jan.05, 2021

Service requested: Material Safety Data Sheet for the Product

Version: 1.0

Applicant: WUHAN FANSO TECHNOLOGY CO.,LTD

Applicant address : Rd.5, Sitai Industrial Park, Yongfeng Avenue, Hanyang District,
Wuhan City, China

Product name: Lithium Thionyl Chloride Battery

Job receiving date: Dec. 13, 2020

Preparation period: Jan. 02, 2021~ Jan. 05, 2021

Composition/Ingredient: Refer to MSDS content

Issued by: Nande (China) Service of Testing
Yinfeng Ind Zone, Hangcheng Street, Gushu, Xixiang,
Bao'an Dist, Shenzhen, China

Written by: Linda

(Linda)

Inspected by: Jose

Material Safety Data Sheet

Product name: Lithium Thionyl Chloride Battery MSDS No.: E27.161.213.002.WFT Issue date: Jan. 05, 2021

Section 1 - Product and Company Identification

Product name: Lithium Thionyl Chloride Battery

Brand name: FANSO

Applicant/ Manufacturer: WUHAN FANSO TECHNOLOGY CO.,LTD

Address: Rd.5, Sitai Industrial Park, Yongfeng Avenue, Hanyang District, Wuhan City, China

Tel: +86-27-84452919

E-mail: lixf@fansobattery.com

Fax: +86-27-84458099

Post code: 430050

Recommended use: Used for electronic instrument

Section 2 - Hazard Description

For the battery cell, chemical materials are stored in a hermetically sealed metal case, designed to withstand temperatures and pressures encountered during normal use. As a result, during normal use, there is no physical danger of ignition or explosion and chemical danger. However, do not open, short-circuit, squeeze, burn, disassemble, expose to flame, mix different models, different chemical properties or different types of batteries. The battery cell case will be breached at the extreme, hazardous materials may be released.

Most important hazard and effects

Human health effects:

Inhalation: The steam of the electrolyte has an anesthesia action and stimulates a respiratory tract.

Skin contact: The steam of the electrolyte stimulates a skin. The electrolyte skin contact causes a sore and stimulation on the skin.

Eye contact: The steam of the electrolyte stimulates eyes. The electrolyte eye contact causes a sore and stimulation on the eye. Especially, substance that causes a strong inflammation of the eyes is contained.

Environmental effects: Since a battery cell remains in the environment, do not throw out it into the environment.

Section 3 - Composition / Ingredient Data

Material

√ Mixture

Material Safety Data Sheet

Product name: Lithium Thionyl Chloride Battery MSDS No.: E27.161.213.002.WFT Issue date: Jan. 05, 2021

Ingredient name	CAS No.	Wt%
Litium	7439-93-2	4.5-5.5
Thionyl Chloride	7719-09-7	40-45
Tetrafluoroethylene	9002-84-0	0.02
Aluminum Chloride	7446-70-0	1-5
Carbon	7782-42-5	3.0-4.0

Section 4 - First Aid Measures

Apply to leak out of the material from inside the Lithium Thionyl Chloride Batteries.

- 4.1. General advice: Show this safety data sheet to the doctor in attendance. After receiving the first-aid measure required, consult a physician if necessary.
- 4.2. Skin contact: Remove contaminated clothing and shoes immediately. Wash off with soap and plenty of water. If chemical burns or skin sustained stimulation, consult a physician immediately
- 4.3. Eyes contact: Check for and remove any contact lenses. Get medical attention. Immediately flush eyes with running water for at least 30 minutes, disappear until the chemical residues so far, keeping eyelids open. Provide a readily-accessible eyewash facility and quick-drench safety shower. Do not rubbing eyes with hand.
- 4.4. Inhalation: Move exposed person to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.
- 4.5. Ingestion: Wash out mouth with water. Move exposed person to fresh air. Keep person warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.
- 4.6. Most important symptoms and effects, both acute and delayed: See Section 2 and Section 11 for more information.
- 4.7. Immediate / special treatment: Symptomatic treatment and supportive therapy as indicated. Following severe exposure the patient should be kept under medical review for at least 48 hours.

Material Safety Data Sheet

Product name: Lithium Thionyl Chloride Battery

MSDS No.: E27.161.213.002.WFT

Issue date: Jan. 05, 2021

Section 5 – Firefighting Measures

- 5.1. Extinguishing media: In case of fire, water flooded ground fire. If the battery is burning, water may not be extinguished, but can use water cooling adjacent batteries so as to control the spread of fire. The preferred medium for small fire is carbon dioxide, dry powder, or foam extinguishing agent, but for the lithium battery is burning may be no use, the battery will burn until complete combustion. In fact, all lithium batteries can be controlled by water. However, when using water to produce hydrogen gas may be mixed with air to form explosive mixture. LITH-X (graphite powder) or copper powder fire extinguishers, sand, dry, powdered dolomite or soda can be used as smothering agent
- 5.3. Special hazards arising from the substance or mixture: In combustion emits toxic fumes, metallic oxides.
- 5.4. Advice for fire-fighter: Firefighters must wear self-contained breathing apparatus, wear full body fire suit, fire extinguishing in the upwind. As far as possible will be transferred to empty containers from the scene. Keep the fire water spray container cooling, until the end of fire.

Section 6 - Accidental Release Measures

- 6.1. Personal precautions, protective equipment and emergency procedures: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8).
- 6.2. Environmental precautions: Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.
- 6.3. Collecting, clearing method and disposal material: Small spill: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. Large spill: Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as

Material Safety Data Sheet

Product name: Lithium Thionyl Chloride Battery MSDS No.: E27.161.213.002.WFT Issue date: Jan. 05, 2021

the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal.

Local waste disposal regulations must be followed

Section 7 - Handling and Storage

- 7.1. Precautions for handling: If the Lithium Thionyl Chloride Battery gives off an odor, generates heat, becomes discolored or deformed, or in any way appear abnormal during use, recharging or storage, immediately remove it from the device and stop using. Don't put the battery excessive vibration, avoid short circuit, however accidental short circuit for a short period of time will not have a serious impact on the battery. Long-term short circuit can make Lithium Thionyl Chloride Battery loss of energy, generate a lot of heat burn skin, and even cause a fire or explosion. Chaos of the battery in bulk in containers, coins, metal accessories, metal workbench, covered by or metal belt and so on Lithium Thionyl Chloride Battery device can be used for assembly is the source of cause a short-circuit. Transport or storage Lithium Thionyl Chloride Battery should have effective measures of prevent short circuit. Don't disassembly or damage to the battery. Away from heat, sparks, open flames and hot surfaces.
- 7.2. Precautions for storage: Stored in a cool, dry and ventilated place, may cause the Lithium Thionyl Chloride Battery performance loss under high temperature, leakage, rust. Don't expose the Lithium Thionyl Chloride Battery under the open flame, stored away from moisture.

Section 8 - Exposure Controls/ Personal Protection

- 8.1. Exposure limit: Thionyl Chloride: ACGIH TLV-CL 4.9 mg/m³ (1 ppm);
Aluminum Chloride: CGIH TLV-TWA 2 mg(Al)/m³.
- 8.2. Engineering control: Ensure adequate ventilation, especially in confined areas. Ensure that eyewash stations and safety showers are close to the workstation location. Use explosion-proof electrical / ventilating / lighting / equipment. Set up emergency exit and necessary risk-elimination area.
- 8.3. Respiratory protection: If the batteies leaks must try to keep the air circulation, avoid operating in a narrow place. In the normal use conditions of use respiratory protective equipment is not necessary. Respiratory protection may be required under exceptional circumstances when excessive air contamination exists.
- 8.4. Eye protection: Not necessary under normal use conditions, if the battery damaged or leaking. Wear goggles/safety glasses giving complete eye protection.
- 8.5. Skin and body protection: Not necessary under normal use conditions, if the battery damaged or leaking wear

Material Safety Data Sheet

Product name: Lithium Thionyl Chloride Battery

MSDS No.: E27.161.213.002.WFT

Issue date: Jan. 05, 2021

appropriate clothing to minimize skin exposure.

8.6. Hand protection: Not necessary under normal use conditions, if the battery damaged or leaking wear appropriate protective gloves

8.7. Other protection: Do not eat, drink or smoke in the workplace. Shower and change clothes after work. Observe the common precautionary measures, contaminated clothes must be changed immediately. Wash hands after work is completed.

Section 9 - Physical and Chemical Properties

Appearance: Battery state under normal temp: Solid

pH value (Specify the concentration): No data

Color: N/A

Odor: N/A

Solubility: Insoluble in water.

Flammability: Non flammability

Melting point: No data

Explosion: Not explode

Section 10 - Stability and Reactivity

10.1. Stability: Stable under normal conditions of use, storage and transport.

10.2. Reactivity: Under the condition of burning may produce harmful breakdown products

10.3. Incompatible materials: Strong oxidizing agents.

10.4. Conditions to avoid: In contrast to the nature of the material, overheating, exposed to damp air or water, mechanical vibration and power abuse.

10.5. Hazardous decomposition products: Hazardous decomposition products formed under the condition of burning .
- Metal oxide, or smoke etc.

Section 11 - Toxicological Information

11.1. Acute toxicity: Aluminum Chloride: Oral-rat LD50: 3450mg/kg, Oral-rat LD50: 1130mg/kg.

11.2. Skin corrosion/irritation: Aluminum Chloride, Lithium: Skin corrosion / irritation (Category 1B).

Thionyl Chloride: Skin corrosion / irritation (Category 1A).

11.3. Eye corrosion/irritation:

Material Safety Data Sheet

Product name: Lithium Thionyl Chloride Battery MSDS No.: E27.161.213.002.WFT Issue date: Jan. 05, 2021

Aluminum Chloride, Thionyl Chloride, Lithium: Eye damage / eye irritation (Category 1).

- 11.4. Respiratory or skin sensitization: According to the existing data, the product is not classified.
- 11.5. Germ cell mutagenicity: According to the existing data, the product is not classified.
- 11.6. Carcinogenicity: According to ACGIH, IARC, NTP is not listed as a carcinogen.
- 11.7. Reproductive toxicity: According to the existing data, the product is not classified.
- 11.8. Specific target organ toxicity –single exposure: May cause respiratory irritation.
- 11.9. Specific target organ toxicity - repeated exposure: According to the existing data, the product is not classified.
- 11.10. Aspiration hazard: According to the existing data, the product is not classified.

Section 12 - Ecological Information

- 12.1. Ecotoxicity values: Aluminum Chloride: Toxicity to fish LC50: 6.17 mg/l (96h);
Crustacean animal EC50: 1.9mg/l (48h); Algae / aquatic plants ErEC50: 0.515mg/l (96h).
- 12.2. Persistence and degradability: No further relevant information available.
- 12.3. Bioaccumulative potential: No further relevant information available.
- 12.4. Mobility in soil: No further relevant information available.
- 12.5. Other adverse effects: Without government permission, do not dispose directly into rivers, watercourses or drains..

Section 13 - Disposal Considerations

- 13.1. Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. Consult state, local or national regulations for proper disposal. The generation of waste should be avoided or minimized wherever possible. Contaminated packaging material should be treated equivalent to residual chemical. Clean packaging material should be subjected to waste management schemes (recovery recycling, reuse) according to local legislation. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Refer to Section 7-Handling and Storage and Section 8-Exposure Controls/Personal Protection for additional handling information and protection of employees.

Section 14 - Transport Information

Material Safety Data Sheet

Product name: Lithium Thionyl Chloride Battery MSDS No.: E27.161.213.002.WFT Issue date: Jan. 05, 2021

UN number	UN3090 OR UN3091
UN Proper shipping name	Lithium Metal Batteries(including Lithium Primary Batteries) or; Lithium Metal Batteries Contained In Equipment(including Lithium Primary Batteries) or; Lithium Metal Batteries Packed With Equip(including Lithium Primary Batteries)
Transport hazard class(es)	IMDG: 9; IATA: 9; ADR/RID: 9; Depending on their lithium metal content, some single cells and small multi-cell battery packs may be non-assigned to Class 9.
Packing group(if applicable)	-
Marine pollutant(Yes/No)	No
Transport in bulk(according to Annex II of MARPOL 73/78 and the IBC Code)	No information available
Special precautions which a user needs to be aware of, or needs to comply with, in connection with transport or conveyance either within or outside their premises	

Transport information: The transportation of primary lithium cells and batteries is regulated by the International Air Transport Association (According to Section IA \Section 1B of PACKING INSTRUCTION 968, or Section II of PACKING INSTRUCTION 969~970 of IATA DGR 61st Edition for transportation), International Civil Aviation Organization, International Maritime Dangerous Goods Code and the US Department of Transportation.

The batteries must meet the following criteria for shipment:

Meet the requirements for the US Department of Transportation listed in 49 CFR 173.185.

The transport of primary lithium batteries is prohibited aboard passenger aircraft.

Refer to the Federal Register December 15, 2004 (Hazardous Materials; Prohibited on the Transportation of Primary Lithium Batteries and Cells Aboard Passenger Aircraft; Final Rule) Lithium batteries shipped as may not be classified as “Dangerous Goods” when shipped in accordance with shipped in accordance with “IATA-DGR” or “special 188 of IMO-IMDG Code”.

Per IATA “Lithium Batteries as Cargo in 2017 Update III”; Lithium Metal Batteries and Batteries (UN3090) are forbidden for transport as cargo on a passenger aircraft. All packages must bear the Cargo Aircraft Only label in addition to the other marks and labels required by the Regulations.

Separate batteries when shipping to prevent short-circuiting. They should be packed in strong packaging for support

Material Safety Data Sheet

during transport.

More information concerning shipping, testing, marking and packaging can be obtained from label master at <http://labelmaster.com>

Transport Fashion: By air, by sea, by railway, by road.

The article is not subject to other provisions of IMO IMDG Code according to special provision 188.
